

HK ALLEY CAT WATCH ADOPTIONS & FOSTERING

Kittens like Titch are dumped by rubbish bins every day. Most still with their umbilical cords still intact. Left to die cold, starving and alone.

In a perfect world, his owner would have never allowed their cat to get pregnant and no healthy and once-loved animal would be destroyed just because they didn't have a home! This world does exist out there somewhere! Here's hoping that we achieve our ultimate goal one day when we don't have to rehome any animal!

Right now we need constant **volunteers** who are available to hand-rear and foster on an ongoing basis at short notice. Please help us source wonderful foster parents by posting this message on to your office & residential/sports noticeboards. **Please email to all your animal loving friends.**

Please get the word out that abandoned animals need your help. We can all help and do something. Please help by printing out this poster.

Combined forces we help rehome thousands of animals each year, all by a network of animal lovers & rescue groups doing what they can. Please become part of our animal rescue network.

Peace and love,

Michelle
